

SOFTAIR - hose-ventilation-system

four different diameters possible: 30 / 60 / 100 / 125 cm

The SOFTAIR hose ventilation system provides for extra ventilation and, as dynamic overpressure ventilation, a cost-efficient yet effective way of improving the fresh air intake for poorly ventilated stable partitions. The range of application of the SOFTAIR hose ventilation system also includes a temperature comfort ventilation for cooling, which is of great importance for maintaining the well-being and health of the animals, especially in the summer months.

Installation in a young cattle barn

WELFARE FOR ANIMALS IS OUR JOB!

Outside example - supply air fan

Speed control ventilator system

Agrotel Softair - hose ventilation

Scope of delivery

- polyester fabric material, antistatic, classified B1 (low flammability), non-dripping with suspension strap, stainless steel eyelets and carbine $e = 50\text{cm}$
- 4 different diameters : 30 / 60 / 100 / 125 cm
- the opening for the air emission depends on the intended purpose and calculation
- overpressure ventilator with excess pressure switch and manual adjustable speed controller
- 4 different types of ventilators from $2800\text{ m}^3/\text{h}$ to $25000\text{ m}^3/\text{h}$
- weather protection cover made of tarpaulin

Benefits at a glance

- Welfare for animals to support their performance and their health
- comfortable climate in the stable in summer and winter
- reduction of drug and veterinary costs
- low initial costs and high usage factor
- low energy input for the amount of fresh air
- easy to clean – important in regard to hygiene
- the polyester fabric-reinforced tube is robust and has a low flammability
